PROFESSIONAL SUMMARY

- Data Analyst with 4+ years of experience delivering analytics, business intelligence, and reporting solutions across financial and operational domains.
- Skilled in SQL, Python, Power BI, Tableau, and Excel for data analysis, KPI reporting, dashboard development, and data visualization.
- Experienced in translating business requirements into analytical solutions, functional specifications, and scalable reporting frameworks to support operational decision-making.
- Strong background in data validation, reconciliation, ETL processes, root cause analysis, and data quality improvement across multi-system environments.
- Proficient in trend analysis, forecasting, anomaly detection, and performance monitoring to uncover business insights and optimize processes.
- Collaborative in cross-functional Agile environments, partnering with stakeholders to improve reporting efficiency, standardize metrics, and drive data-driven business outcomes.

TECHNICAL SKILLS

- **Data Analysis:** Statistical modeling, anomaly detection, cohort analysis, risk assessment
- **Programming:** Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL (MySQL, Oracle, SQL Server)
- **Visualization:** Power BI, Tableau, Excel Dashboards
- **Databases & ETL:** SQL Server, Oracle SQL, Snowflake, data cleaning and transformation, JSON, XML
- **Machine Learning:** Classification, regression, sentiment analysis, model evaluation
- **Business Intelligence:** KPI reporting, financial reporting, cost optimization, predictive analytics, dashboard automation
- **Methodologies:** Agile Scrum, Waterfall, SDLC
- **Tools:** Jira, MS Office Suite, Postman, Selenium, Tosca

EDUCATION

Master of Science in Computer Science

North Carolina A&T University, Greensboro, NC, USA

May 2025

Bachelor of Technology in Computer Science & Engineering

Jawaharlal Nehru Technological University, Hyderabad, India

May 2018

TEACHING ASSISTANT (Aug 2024 – May 2025)

- Provided assistance with Python, SQL, and Power BI exercises, offering technical guidance to students on practical data manipulation and visualization techniques.
- Facilitated small group discussions and tutoring sessions to help students grasp complex statistical and machine learning concepts.
- Assisted in maintaining the course LMS(Learning Management System) and collaborated with professors to develop teaching materials, assignments, and frameworks aligned with learning objectives.
- Graded assignments, exams, and projects, ensuring timely and constructive feedback to enhance student learning outcomes, while also providing office hours to address student queries and clarify complex concepts.

WORK EXPERIENCE

Data Analyst

Aug 2025 – Present

Binary AI Gen, KS, USA

- Analyzed operational datasets to identify process bottlenecks, workflow inefficiencies, and turnaround delays, supporting process optimization initiatives.
- Defined, tracked, and reported KPIs including cycle time, backlog volume, throughput, and exception rates to improve operational visibility and performance monitoring.
- Developed interactive Tableau dashboards and automated reporting solutions, enabling stakeholders to monitor trends and make data-driven decisions.
- Performed data validation, reconciliation, and root cause analysis across multiple systems to improve reporting accuracy and maintain data integrity.
- Collaborated with business stakeholders to gather requirements, define reporting logic, and deliver analytical solutions aligned with operational goals.
- Supported data cleaning, transformation, and standardization efforts to enhance reporting consistency across enterprise datasets.

Data Analyst

Mar 2021 – Dec 2022

Infosys Limited (Edge verve – Client: ICICI Bank), Hyderabad, India

- Built and automated Power BI dashboards with drill-downs for loan delinquency, mutual fund performance, and repayment rates, enhancing executive decision-making.
- Analyzed end-to-end transaction workflows to identify bottlenecks, delays, and inefficiencies, improving operational visibility and decision-making.
- Partnered with business stakeholders to define problem statements, success metrics, and value hypotheses for analytics initiatives aligned with operational strategy.
- Performed data mapping, validation, and reconciliation across multiple systems to improve data quality and ensure consistency across reporting layers.
- Partnered with finance teams to model the impact of RTA mergers and ARN changes, ensuring accurate transaction reporting during system transitions.
- Tracked KPI improvements and reported business impact of analytics initiatives to support value measurement and portfolio visibility.
- Produced predictive reports on delinquency patterns using statistical methods, supporting proactive risk management initiatives.
- Authored KPI definitions, transformation logic, and dashboard user guides, cutting clarification queries from business teams by 20%.

Data Analyst

Nov 2019 – Feb 2021

Infosys Limited (Edge verve – Client: DBS), Hyderabad, India

- Extracted and standardized multi-year transactional and portfolio data from SQL Server and Oracle, ensuring accuracy and consistency across banking systems.
- Worked with business stakeholders to translate requirements into reporting logic and functional specifications for dashboards and analytics solutions.
- Documented data workflows, mappings, and reporting definitions to support data governance, consistency, and adoption across teams.
- Conducted trend analysis on loan portfolios segmented by product type and region, enabling early detection of repayment risks for stakeholders.
- Partnered with product managers to translate business requirements into data-driven dashboards and KPI reports, ensuring alignment with executive needs.
- Performed variance analysis on customer transaction data, highlighting anomalies and unusual patterns that guided compliance reviews.
- Delivered ad-hoc reports to support regulatory and audit requirements for client banks, reducing turnaround time from 3 days to 1 day.
- Documented data transformation workflows and dashboard specifications in Confluence, facilitating smoother adoption by business and risk teams.

Quality Assurance

Dec 2018 – Oct 2019

Infosys Limited (Finacle Product- Wealth Management System, Client: Axis Bank), Hyderabad, India

- Validated backend data accuracy across multiple environments using SQL queries to ensure consistency between ETL processes, application databases, and reporting outputs.
- Analyzed defect trends, testing metrics, and system performance data to identify recurring issues and improve release quality and operational efficiency.
- Automated 200+ test scenarios using Tosca and Selenium, reducing manual validation effort by 25% and accelerating regression testing cycles by 30%.
- Collaborated with cross-functional Agile teams during requirement reviews and sprint planning to translate business requirements into testable workflows and improve delivery readiness.
- Reported and tracked defects in Jira with detailed analysis, helping reduce average issue resolution time from 3 days to under 2 days.
- Participated in Agile ceremonies (sprint planning, retrospectives) and translated QA results and risks into business terms, helping identify blockers early, align priorities, and improve test readiness across sprints.

INDIVIDUAL PROJECTS

- **SaaS Churn & Revenue Analytics:** Analyzed a multi-table SaaS dataset using SQL and Python to identify key drivers of churn and revenue leakage, including trends across tenure, industry, and plan tiers. Built an interactive Power BI dashboard to visualize churn rate, MRR impact, and customer segments. Generated insights on early-stage churn, feature usage, and support performance to support data-driven retention strategies.
- **Credit Card Fraud Detection & Risk Analytics:** Built an end-to-end fraud detection system on 280K+ transactions, handling class imbalance with SMOTE. Evaluated multiple ML models and optimized Random Forest to detect fraud with high precision and recall, uncovering key patterns in transaction behavior.

- **Superstore Sales Data Analysis:** Analyzed a retail Superstore sales dataset to uncover sales trends, customer segments, and product performance. Built interactive Power BI dashboards visualizing sales by region, category, and time period. Applied data cleaning, aggregation, and KPI calculations to improve reporting accuracy and support data-driven inventory and marketing decisions.
- **Amazon Food Reviews Sentiment Analysis:** Performed sentiment analysis on 500,000+ reviews using NLP techniques like TF-IDF and word embeddings. Built and compared models including Logistic Regression, XGBoost, & an LSTM-CNN hybrid, achieving 93.9% accuracy and 96.4% F1 score. Conducted data cleaning and visualization to highlight key sentiment trends.

CERTIFICATIONS

- Databricks Certified Data Analyst Associate
- Microsoft Certified: Azure Data Scientist Associate (DP-100)
- Microsoft Certified: Azure AI Fundamentals. (AI-900)
- LinkedIn Learning: Docker Foundations Professional Certificate
