PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience working across banking and financial data. Skilled in SQL, Python, and Power BI to build automated dashboards, improve reporting accuracy, and surface meaningful trends. Experienced in statistical modeling, anomaly detection, and reconciling complex datasets, translating messy data into clear insights that support operational and strategic decisions. Comfortable working with cross-functional teams to define requirements and deliver analytics that align with business goals.

TECHNICAL SKILLS

- **Data Analysis:** Statistical modeling, anomaly detection, cohort analysis, risk assessment
- **Programming:** Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL (MySQL, Oracle, SQL Server)
- **Visualization:** Power BI, Tableau, Excel Dashboards
- **Databases & ETL:** SQL Server, Oracle SQL, Snowflake, data cleaning and transformation
- **Machine Learning:** Classification, regression, sentiment analysis, model evaluation
- **Business Intelligence:** KPI reporting, financial reporting, cost optimization, predictive analytics, dashboard automation
- **Methodologies:** Agile Scrum, Waterfall, SDLC
- **Tools:** Jira, MS Office Suite, Postman, Selenium, Tosca

EDUCATION

Master of Science in Computer Science

North Carolina A&T University, Greensboro, NC, USA

May 2025

Bachelor of Technology in Computer Science Engineering

Jawaharlal Nehru Technological University, Hyderabad, India

May 2018

TEACHING ASSISTANT (Aug 2024 – May 2025)

- Provided assistance with Python, SQL, and Power BI exercises, offering technical guidance to students on practical data manipulation and visualization techniques.
- Facilitated small group discussions and tutoring sessions to help students grasp complex statistical and machine learning concepts.
- Assisted in maintaining the course LMS(Learning Management System) and collaborated with professors to develop teaching materials, assignments, and frameworks aligned with learning objectives.
- Graded assignments, exams, and projects, ensuring timely and constructive feedback to enhance student learning outcomes, while also providing office hours to address student queries and clarify complex concepts.

WORK EXPERIENCE

Data Analyst

Mar 2021 – Dec 2022

Infosys Limited (Edge verve – Client: ICICI Bank), Hyderabad, India

- Built and automated Power BI dashboards with drill-downs for loan delinquency, mutual fund performance, and repayment rates, enhancing executive decision-making.
- Conducted cohort and segmentation analysis by borrower tiers and loan purpose, driving targeted collection strategies that improved recovery by 12%.
- Created SQL scripts for anomaly detection to identify irregular transactions, strengthening fraud detection and reducing false positives by 22%.
- Delivered weekly portfolio performance insights to business leaders, highlighting repayment gaps and underperforming loan categories.
- Partnered with finance teams to model the impact of RTA mergers and ARN changes, ensuring accurate transaction reporting during system transitions.
- Cross-validated dashboard outputs against SQL query results, raising stakeholder confidence and reducing error-related escalations by 35%.
- Produced predictive reports on delinquency patterns using statistical methods, supporting proactive risk management initiatives.
- Authored KPI definitions, transformation logic, and dashboard user guides, cutting clarification queries from business teams by 20%.

Data Analyst

Nov 2019 – Feb 2021

Infosys Limited (Edge verve – Client: DBS), Hyderabad, India

- Extracted and standardized multi-year transactional and portfolio data from SQL Server and Oracle, ensuring accuracy and consistency across banking systems.
- Designed and deployed Power BI dashboards with interactive filters for deposits, withdrawals, and loan disbursements, reducing manual reporting by 30%.

- Built SQL-based reconciliation reports to identify mismatches between source and downstream systems, improving reporting accuracy by 18%.
- Conducted trend analysis on loan portfolios segmented by product type and region, enabling early detection of repayment risks for stakeholders.
- Partnered with product managers to translate business requirements into data-driven dashboards and KPI reports, ensuring alignment with executive needs.
- Performed variance analysis on customer transaction data, highlighting anomalies and unusual patterns that guided compliance reviews.
- Delivered ad-hoc reports to support regulatory and audit requirements for client banks, reducing turnaround time from 3 days to 1 day.
- Documented data transformation workflows and dashboard specifications in Confluence, facilitating smoother adoption by business and risk teams.

Quality Assurance

Dec 2018 – Oct 2019

Infosys Limited (Finacle Product- Wealth Management System, Client: Axis Bank), Hyderabad, India

- Tested and certified software defect fixes and new functionality by executing functional, regression, and application tests across web and API modules.
- Decreased manual QA workload by 25% by automating 200+ test scripts using Tosca across User Interface(UI) and Application Programming Interface(API) layers.
- Executed 150+ manual test cases across web applications, focusing on UI accuracy, cross-browser compatibility, usability, and exploratory edge cases, helping reduce undetected bugs by 12%.
- Built optimized Selenium test suites with parallel execution and reusable components, which accelerated regression testing cycles by 30% while ensuring full functional coverage.
- Participated in Software Requirement Specification (SRS) reviews, created detailed test plans, executed manual test scenarios, and developed automation scripts to ensure full coverage of functional requirements.
- Reported 100+ issues in JIRA with clear reproduction steps, expected vs. actual results, and screenshots, reducing average fix time from 3 days to under 2.
- Ensured backend data accuracy across 3+ environments by writing SQL queries to validate ETL results and application database states.
- Participated in Agile ceremonies (sprint planning, retrospectives) and translated QA results and risks into business terms, helping identify blockers early, align priorities, and improve test readiness across sprints.

INDIVIDUAL PROJECTS

- **SaaS Churn & Revenue Analytics:** Analyzed a multi-table SaaS dataset using SQL and Python to identify key drivers of churn and revenue leakage, including trends across tenure, industry, and plan tiers. Built an interactive Power BI dashboard to visualize churn rate, MRR impact, and customer segments. Generated insights on early-stage churn, feature usage, and support performance to support data-driven retention strategies.
- **Credit Card Fraud Detection & Risk Analytics:** Built an end-to-end fraud detection system on 280K+ transactions, handling class imbalance with SMOTE. Evaluated multiple ML models and optimized Random Forest to detect fraud with high precision and recall, uncovering key patterns in transaction behavior.
- **Superstore Sales Data Analysis:** Analyzed a retail Superstore sales dataset to uncover sales trends, customer segments, and product performance. Built interactive Power BI dashboards visualizing sales by region, category, and time period. Applied data cleaning, aggregation, and KPI calculations to improve reporting accuracy and support data-driven inventory and marketing decisions.
- **Amazon Food Reviews Sentiment Analysis:** Performed sentiment analysis on 500,000+ reviews using NLP techniques like TF-IDF and word embeddings. Built and compared models including Logistic Regression, XGBoost, & an LSTM-CNN hybrid, achieving 93.9% accuracy and 96.4% F1 score. Conducted data cleaning and visualization to highlight key sentiment trends.

CERTIFICATIONS

- Databricks Certified Data Analyst Associate
- Microsoft Certified: Azure Data Scientist Associate (DP-100)
- Microsoft Certified: Azure AI Fundamentals. (AI-900)
- LinkedIn Learning: Docker Foundations Professional Certificate
